Q6 - What is our biggest success?

What is our biggest success?

n/a

Networking with community partners

networking and partnerships

Bringing together community partners to reach for a common goal

bringing community partners together

I think it is a huge success to just have all of these different partners at the table to work towards something collaborative.

Networking and meeting new people.

Beginning the conversation for change. I think the biggest struggle, especially when focusing on disparaged groups in Tulsa, is the lack of continuity after identifying an issue.

October was my first in person meeting, I was impressed with the quality and depth of knowledge of the speakers.

Bringing together community members
Q7 - What is our biggest area for improvement?

n/a

Communication
community engagement
clinical outreach/service

Having smaller attainable goals to reach for

Buy-in from community partners. Enough “wins” and productive meetings so they continue to participate

I think some additional time and effort needs to go into getting buy-in for the use of Teams. It seems like people don't really use it much.

Collaborating on goals and making progress.

More people! Not sure how to ring that bell louder, but the quarterly CHIP meetings seem to be so much more robust than the workgroups as far as participation.

Need additional opportunities for workgroups to interact and develop collaborative projects.

More achievable goals. Communication outside of Teams. Continue emailing info for members who don't check or use Teams.

Q8 - Any suggestion to improve the CHIP Quarterly meetings?

n/a

everything is good

They need to be more organized.

great job in 2023!

Shorter together time in a big group and allow people to meet as a small group

N/A
I'm not sure if attendance in October was up or down from prior meetings, but I would like to see more people attend. Maybe promoting the planned speakers would increase attendance.

Q9 - Any suggestion to improve the CHIP Workgroup meetings?

Highlight what the community partners get out of participating. We are very busy and don't have time for another meeting.

More people with diverse ideas. Often feels filled with the same players.
