
Commissary Information for Mobile Food Establishments

A commissary is a facility used to maintain safe and sanitary operations for the cleaning and servicing of pushcarts, mobile retail units, and mobile food establishments; and for the storage of food and single service articles used in those units.

Every mobile is required to report to their commissary location daily to dispose of waste water, refill with potable water, and service the unit if not operating in conjunction with an event or celebration OR parked at the site of a commissary licensed to the same owner as the mobile establishment. Commissaries used for food preparation and utensil washing that are located outside the State of Oklahoma must provide proof of licensure and inspection from the jurisdiction in which they are located.

The commissary location listed below will be used for food and/or equipment storage; cleaning and servicing purposes; and/or serve as the base of operations for the mobile establishment listed.

Fill out and return to THD before licensing
